

India's  
Agricultural  
Crop Production  
Analysis(1997-  
2021)

I am a  
former in  
India.

I am magician  
who produces  
money from  
mud.

I work hard  
to cultivate  
crops each  
year.

I face challenges  
like  
unpredicable  
weather and  
changing  
climate patterns.

Hopeful for a  
prosperous  
harvest  
season.

Worried about  
the uncertain  
weather  
conditions.

Worried about  
providing my  
family and  
people.

I feel that  
agriculture with  
different crop  
items will satisfy  
the people's  
need.

I hope this  
year's  
monsoon will  
be good for  
my crops.

Seeks advice  
from fellow  
farmers in  
the village.

I need to  
produce  
better  
crops.

To introduce  
new  
technique for  
improving the  
yeild of crops.

Sowing  
seeds by  
traditional  
method.

Visit local  
market to  
understand  
price trends.

I am  
concerned  
about market  
prices for my  
crops.

Watches  
weather  
forecasts  
regularly.
